SENSIL®

B R E E Z E

Sensil® Breeze premium nylon helps **keep you cool** in warm weather and during physical exertion. Its unique technical properties **reduce body temperature***, enhancing the inherent comfort and moisture management benefits of Nylon 6.6.

TECHNOLOGY

Unique yarn and fabric properties allow for quick transfer of heat away from the body.

A proprietary additive impacts the physical structure of the fabric, making the cooling benefit permanent - it doesn't wash out!

Innovative fiber cross section and fine yarn construction create fabrics with excellent drape and improved comfort

BENEFITS

Cooling effect helps maintain a comfortable body temperature during and after physical performance and in hot weather

Efficient ventilation facilitates optimal physical performance

UV protection provided by the unique polymer
Ultra-soft hand feel, providing a smooth sensation on the body

CERTIFICATION

Sensil® Breeze has been independently tested and proven to lower body temperature by the Centexbel Textile Research Center in Belgium. A copy of the lab report is available upon request.
